EXPERIENCE

BNP Paribas CIB, AI Lab – Graduate Program

Paris & Lisbon

Rotation 2 – Forward Deployed Engineer / Front Office Credit Analyst (Lisbon)

Mar 2026 - Present

- Covered French corporate credit portfolios of 4 billion euros, analyzing counterparty risk, financials, ratings
- Mapping credit workflows to identify high-impact AI/automation use cases (products recommendation, Agentic financial analysis, translation...), bridging front-office business needs with the AI Lab

Rotation 1 – Data Scientist – AI for Investment Banking (Paris)

Oct 2025 – Feb 2026

- Deployed agentic AI pipelines (internal & external) for automated web research, deal content generation, M&A targets filtering, reducing junior banker's workload by 12 hours per week across all CIB in Europe and America
- Contributed to team hiring: screened candidates and conducted +20 technical interviews

BNP Paribas CIB, AI Lab – Analytics Consulting

Paris, France

Research Scientist intern

Apr 2025 – Sep 2025

- Designed a SOTA multimodal RAG benchmark evaluating 15 retriever/generator models (ColPali, Intern, Qwen, OpenAI, Mistral...) on financial domains (Private Equity, Investment Banking, KYC...)
- Drove research integrated into the enterprise LLM platform provided for all CIB (+35k users)
- Won the internal AI Hackathon with an agentic email-drafting system

Danone Nutricia Research

Paris, France

Machine Learning engineer intern

Apr 2024 – Sep 2024

- Architected MLOps templates on Azure Databricks, standardizing model development and deployment practices across 3 international data teams (Singapore, Utrecht, France) and +70 users
- Deployed ML models via FastAPI and Docker, cutting inference time by 50% on the Danone app (100k+ users)

OneVisage

Lausanne, Switzerland

Data Scientist intern

Feb 2023 – Aug 2023

- Developed a 2D biometric facial verification AI model for VIP zones access at the Paris 2024 Olympics
- Researched a multi-modal fusion (RGB, IR, depth map) to improve facial verification under spoofing

Orange

Paris, France

Data Engineer intern

Sep 2021 – Feb 2022

- Migrated a Big Data application on GCP, processing 1M+ of rows per day via optimized SQL pipelines
- Built multi-environment infrastructure with Terraform + CI/CD in an Agile/DevOps setup

EDUCATION

Ecole Polytechnique / HEC Paris

2023 – 2025

Msc Data Science and AI and Business – 2nd Best Master's in Business Analytics in the world (QS 2026)

University of Technology of Compiegne

2018 – 2023

Engineering diploma in Computer Science, specialization in AI – 3.79 / 4 GPA

PROJECTS

Freelance web project — Designed, built and deployed the website of my city's Choir

Feb 2026 – Present

Master Thesis on LLM GraphRAG supervised by Fabien Caspani (BNP Paribas CIB)

Feb 2025 – Jun 2025

Winner of the HEC Paris finance challenge

Oct 2024 – Nov 2024

- Designed a data-driven interest-rate strategy to win a 2-week lending simulation, ranking #1 out of 10 teams

ADDITIONAL

Cloud & MLOps: Azure Databricks, GCP, Terraform, Docker, FastAPI,, MLflow, Git

Certifications: Google Data Analytics Professional – DataCamp Data Scientist professional

Languages: Fluent in French, English (advanced – C1 | TOEFL ibt **107/120**), Chinese (intermediate – B1)

Hobbies: Tennis in competition, jogging, guitar, hiking and calisthenics
